

Micro Foosball Game

Written By: Cy Tymony

TOOLS:

- [Scissors \(1\)](#)

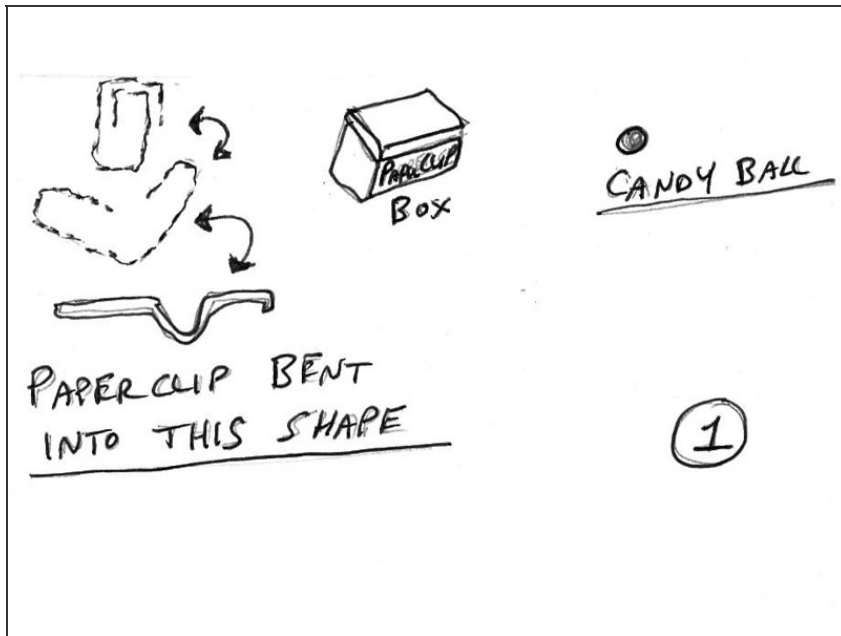

PARTS:

- [Paper clips \(12\)](#)
- [Paper clip box \(1\)](#)
- [Gumball \(1\)](#)
[or jawbreaker candy](#)
- [Tape \(1\)](#)

SUMMARY

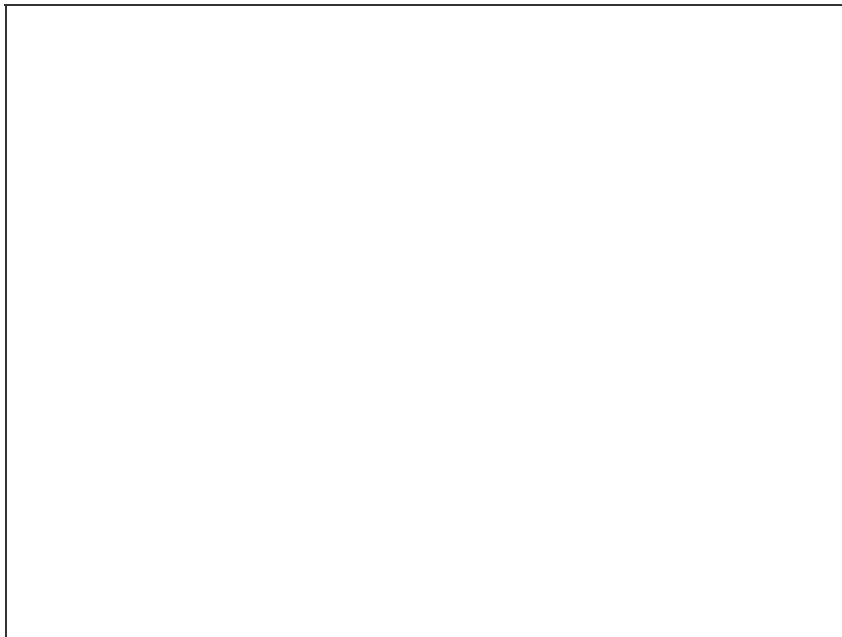

Want to make an even more compact, pocket-size foosball game? Here's how.

Step 1 — Make the paddle arms.

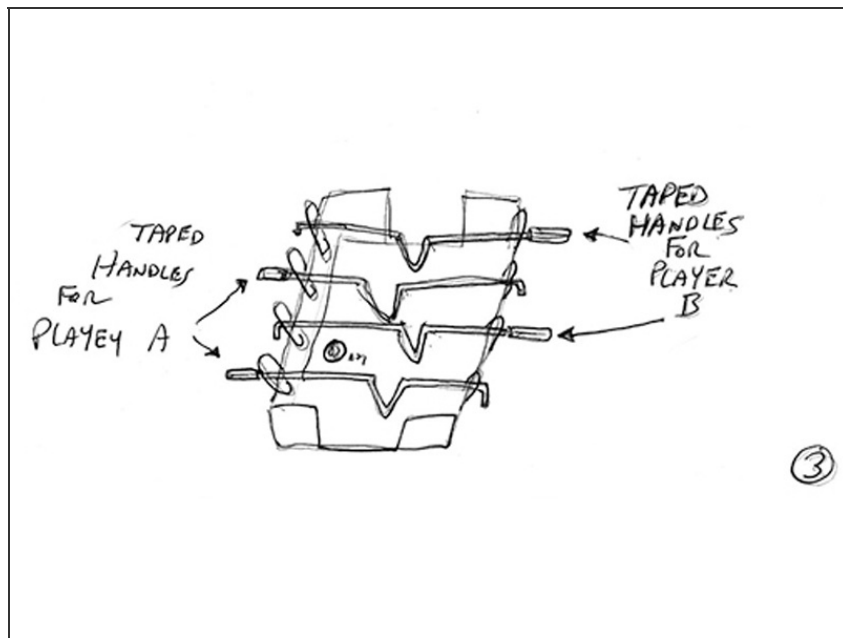

- Straighten 4 paper clips and bend them into the shape as shown, being sure to include a “V” near the center to act as a game paddle.
- Notice the “hook” on alternating ends of each paper clip — this will prevent the paper clip paddles from sliding out of the paper clip guides.
- Wrap some tape at the non-hook ends of each paddle to act as handle grips for each player.

Step 2 — Prepare the box.

- Cut off the top flap of the paper clip box, and cut away a square section at each end of the box for the ball to eject.
- Slide 8 paperclips onto the long sides of the box, 4 per side, evenly spaced.

Step 3 — Install the paddle arms.

- Slide the 4 paper clip paddle arms into the paper clip guides on each side.
- Toss the candy ball on the micro game board, and you're ready to play.
